

Please email your submissions to [mattroid @ arcadecrusade.com](mailto:mattroid@arcadecrusade.com) following the below guidelines with your name so you may be given credit for your contribution.

- Please submit an original scan and not a scan found on the Internet as those may have been altered by either color correction or re-sampled to acquire a specific DPI/size.
- Do not use black construction paper or similar while scanning. This causes the whites to become less vibrant. Just scan as is with no dark backing.
- Scan your original marquee at 300 DPI with no automatic color/contrast corrections.
- Allow extra room around your marquee when scanning so it can be cropped to a standardized size.
- Save as an uncompressed TIFF (.tif) file for lossless quality. Each image will be approximately 7MB in size.

If you have a marquee in better condition than one that's currently in the archive, please submit it. If you have a marquee that's in poor condition that isn't in the archive or a marquee in a different language, please submit it. We are striving for the most accurate and complete archive possible. Visit us at <http://www.arcadecrusade.com/gallery/v/minimarquees/witchboard/>

† Denotes original mini was paper.
